LOWER RISK

HIGHER RISK

RISK LEVEL 5 – Low to Moderate Investment Risk

You are looking to maintain the real value of your investments by achieving returns above inflation. Preserving the value of your investment remains important, but you are willing to accept short term volatility to generate potentially higher long-term investment returns. The portfolio will be more evenly balanced between equities and the combined asset classes of cash, fixed interest and alternatives.

Asset mix

- Cash
- Equities
- Fixed income
- Alternatives

Asset class	Asset	Weight*
UK	Vanguard FTSE U.K. Equity Income Index Fund Inc	18.00%

Key Investor Information Documents (KIID) are available online at www.brewin.co.uk

*Actual level will reflect benchmark composition at each rebalance date.

Charges for this portfolio	Estimated underlying fund charges ²	0.19%
	BPS fee	0.70%
	Total cost	0.89%

1. The funds annotated have a small one-off charge as detailed in the KIID which will marginally increase the total cost in the first year above the amount shown in this table.

2. Ongoing Charges Figure – an estimate of the cost associated with investing in external collective funds. The nature of collective funds means that charges incurred in the running of the fund, such as management fees, transaction costs and administrative charges, are included in the total fund valuation. Such costs are not charged directly to Brewin Dolphin portfolios, but impact indirectly through the corresponding reduction in the value of the collective fund. Fund managers quote such costs as a percentage of the overall fund value. This is referred to as an Ongoing Charges Figure (OCF).

Historic asset mix characteristics for the last 5 years
